Robert Keel

Executive Vice President at Tanner Pharma Group
Basel, Basel, Switzerland

Summary

At Tanner Pharma Group, we work with biopharma companies and non-profit organizations to provide access to medicines in countries where they are currently not accessible, either because a regulatory approval has not been granted for the medicine in the country or because patients don't have the ability to fund treatment. Our services and programs span managed access, early access, expanded access, compassionate use, post-trial supply, market withdrawals, supply shortages and global donations. We have been working for the past 20 years to improve lives by increasing access to medicines around the world, and we have a particular passion for supporting the rare disease community to address significant gaps in access to treatment.

At Tanner Pharma, we have a committed and passionate team of experts that provide a high-touch level of service. Some of the philosophies we aim to live by in the Managed Access Programs division when servicing our customers, partners, healthcare providers, and patients are:

- Treat every situation with the same level of urgency, responsiveness, and compassion as if trying to help a family member
- We are distributing life-saving medicines so extra care needs to go into ensuring the quality of our supply chain
- Actions speak louder than words
- Diseases don't take a break on nights and weekends
- Own our mistakes and take responsibility for them when it's our fault
- Be transparent and honest through all our interactions
- Celebrate successes, but don't become complacent – strive for continuous improvement
- Focus on finding solutions and dealing with the task at hand, not placing blame or finding reasons why something can't be done
- Do what is needed to get the job done, regardless of what your role is or what is stated in a contract

If you think there is a something with which Tanner Pharma can support, then please reach out via LinkedIn or at map@tannerpharma.com.

Experience

MVA Society

Trustee

September 2024 - Present (3 months)

London Area, United Kingdom

The MVA Society is a patient advocacy group established as a focal point for the ultra-rare genetic condition Mosaic Variegated Aneuploidy syndrome. The aims of the MVA Society are to act as a patient advocacy support and information resource, build a community of practise and patient cohort, and investigate research into screening, surveillance and treatment of MVA.

Tanner Pharma Group

8 years 2 months

Executive Vice President of TannerMAP

August 2021 - Present (3 years 4 months)

Basel, Switzerland

At Tanner Pharma Group, we partner with companies to provide access to their medicines in countries where they are not commercially accessible, either because a marketing authorization has not been granted or patients do not have the financial means to pay for them. Our TannerMAP division specializes in designing and delivering named patient supply, US expanded access, compassionate use, early access, managed access, post-trial supply, product withdrawal, and global donation programs.
